SMZ

ZANZIBAR EXAMINATION COUNCIL

FORM THREE ENTRANCE EXAMINATION

CHEMISTRY

TIME: 2:30 HOURS

Monday 14 September, 2015

INSTRUCTIONS TO CANDIDATES

1. This paper consists of THREE sections A, B and C.
2. Answer ALL questions in Section A and B, and any TWO questions in section C. Question (9) is compulsory.
3. All answers must be written in the space provided under each question.
4. Write your examination number on each page
5. The following constants may be helpful
Na = 23, Cl = 35.5 K = 39, O = 16
6. Cellular phones are not allowed in examination room.

FOR EXAMINER'S USE ONLY

THIS PAPER CONSISTS OF 14 PRINTED PAGES

SECTION A (30 Marks)**Answer ALL questions in this section.****1.** Choose the letter of the best answer and write it on the space provided.i) Most of the group I elements in periodic table are stored under ()

- A: Petrol B: Spirit
C: Water D: Kerosene oil

ii) The elements Helium, Neon and Argon are known as ()

- A: Alkali metals B: Rare earth
C: Inert gases D: Halogens

iii) You can hold the burette upright by using ()

- A: Tripod stand B: Retort Stand
C: Trough D: Rack

iv) A solid part remaining on the filter paper after filtration is called ()

- A: Distillate B: Evaporation
C: Residue D: Filtration

v) Pure water boils at ()

- A: 50°C B: 70°C C: 100°C D: 80°C

vi) $\text{Fe} + \text{S} \longrightarrow \text{FeS}$ ()
This reaction is an example of

- A: Double decomposition B: Combination (synthesis)
C: Displacement D: Neutralization

vii) Which of the following is not component of air ()

- A: Carbon dioxide B: Hydrogen
C: Nitrogen D: Noble gas

viii) The element with atomic number 11, will have a valency of ()

- A: 1 B: 3 C: 2 D: 6

ix) Two immiscible liquids can be separated by ()

- A: Fractional distillation B: Decantation
C: Filtration D: Separating funnel

x) One of the gas is tested by using lime water ()

- A: Sulphur dioxide B: Carbon dioxide
C: Nitrogen D: Chlorine

2. Match the sentences from **LIST A** with the correct words in **LIST B**. Write the correct letter in the space provided.

LIST A

- | | |
|---|-----|
| i) Applied in different fields | () |
| ii) Fabrics, clothes, dyes | () |
| iii) Fume chamber | () |
| iv) Rekindles a glowing splint | () |
| v) It produces both luminous and non-luminous flame | () |
| vi) Substances can be heated to very high temperature using | () |
| vii) Usually used with filter funnel | () |
| viii) A sudden loss of consciousness | () |
| ix) It takes the shape of the container | () |
| x) There is formation of new substances | () |

LIST B

A: Harmful gases	B: Crucible	C: Fainting
D: Textile	E: Chemical change	F: Chemistry
G: Bleeding	H: Separating funnel	I: Bunsen burner
J: Liquid	K: Filter paper	L: Oxygen
M: Physical change	N: Bulb	

3. You are required to fill in the blank spaces. One word for each space.

- i) The periodic table classify elements into _____ and _____
- ii) The only liquid metal is _____
- iii) A _____ solution is one that can dissolve no more _____ at a given _____
- iv) A _____ is a substance that _____ up a _____ reaction but remains chemically unchanged
- v) Hydrogen is the _____ gas and the most abundant element in the universe.

SECTION B: 50 (Marks)

Answer ALL questions in this section

4. a) Find the oxidation state of chlorine in the compound KClO_3

- b) A certain compound contains 39.3% Sodium and 60.7% Chlorine.
Calculate its

i) Empirical Formula

ii) Molecular formula if its Relative molecular mass is 58.5

iii) Name the compound.

iv) Write the common name of the compound

v) Predict the type of bonding formed between Sodium and chlorine

vi) Show its formation

5. a) Write the names of each of the following compounds

- i) $(\text{NH}_4)_2 \text{SO}_4$ - _____
- ii) Na_2O - _____
- iii) ZnCl_2 - _____
- iv) Al_2O_3 - _____
- v) KNO_3 - _____

b) Write the formula of each of the following compounds ✓

- i) Copper (II) hydroxide _____
- ii) Calcium nitrate _____
- vii) Calcium hydrogen Sulphate _____
- viii) Sodium bicarbonate _____
- ix) Carbon disulphide _____

6. a) Predict the methods that you would use to separate the following substances.

- i) The coloured pigments used in inks _____
- ii) Ammonium chloride and sodium chloride _____
- iii) Petrol and water _____
- iv) Iron and Sulphur _____

Candidate 's Number.....

b) Illustrate (with diagram) the process of separating alcohol and water

- c) i) Write the name of the process _____
- ii) Give the reasons for choosing the process _____

7. a) List two (2) methods of purifying water.

- i) _____
- ii) _____

b) Describe the importance of water treatment

c) State four importance of water

- i) _____
- ii) _____
- iii) _____
- iv) _____

8. a) Select the characteristics of non luminous flame. Put the tick to the correct one

- i) Blue in colour _____
- ii) Produces soot _____
- iii) Produces more heat _____
- vi) Suitable for cooking _____
- v) Used in the flame test _____
- vi) Yellow in colour _____
- vii) Burns quietly _____
- viii) Easily brightens a room _____

Candidate 's Number.....

- b) Draw a source of flame showing non- luminous zone, and on it show the outer zone , middle zone and inner zone

SECTION C (20 Marks)

Answer ANY TWO (2) questions from this section

Questions 9 is **COMPULSORY**. It has two items (9a) and (9b). Answer either (9a) or (9b).

9. a) You are provided with three pieces of iron, which has rusting on them
- i) Identify the necessary conditions for rusting of iron to occur
- _____
- _____
- _____
- ii) List three methods that can be used to prevent iron from rusting.
- _____
- _____

- iii) Predict the mass of iron when it gets rust, does it increase or decrease? _____
- iv) Is rusting a chemical change or physical change? _____
- v) Write the reasons for your choice

- vi) If the new pieces of iron are placed in a test tube which contains anhydrous calcium chloride and the test tube is then closed with cotton wool. Explain what will happen to the pieces of iron?

- vii) State the function of
Anhydrous calcium chloride _____
Cotton wool _____

9b) While he was in a laboratory Zahrani prepared a gas M. He took Zinc granules and dilute Sulphuric acid. He collected that gas over water. From this information answer the questions.

- i) The gas M prepared by Zahrani was _____
- ii) The gas is tested by _____

- iii) List all the apparatus he used in the preparation of the gas

M

- iv) Write any two uses of the gas M.

- v) Complete the equation

Zinc + dil Sulphuric acid $\longrightarrow$ _____

- vi) Transform the word equation (above) into symbols and balance it

10. a) You are given the following symbols

${}^6_3\text{Li}$, ${}^{23}_{11}\text{Na}$, ${}^{24}_{12}\text{Mg}$, ${}^{16}_8\text{O}$, ${}^{39}_{19}\text{K}$, ${}^{19}_9\text{F}$

Complete the table below through the given informations

ATOM	MASS NUMBER	NO. OF ELECTRONS	NO. OF NEUTRONS	NO. OF PROTONS
Li	6			3
Na	23	11		
Mg	24		12	
O	16			8
K	39	19		
F	19		9	

- b) Classify the above atoms into metals and non – metals

Metals	Non-Metals

- c) Write the electronic configurations of atoms

i) Li : _____

ii) F: _____

- d) i) Show the representation of the nucleus of the Oxygen atom

ii) Predict the bond formed when:

two atoms of oxygen combine, show it

Sodium and oxygen combine, show it

11. a) Outline the importance of chemistry in our daily life activities. Use the following sub-heading as guidelines

Introduction:

Agriculture:

Medicine

Candidate 's Number.....

Food and beverage

Transport and communications
